

You have a peace of mind when your loved ones are happy

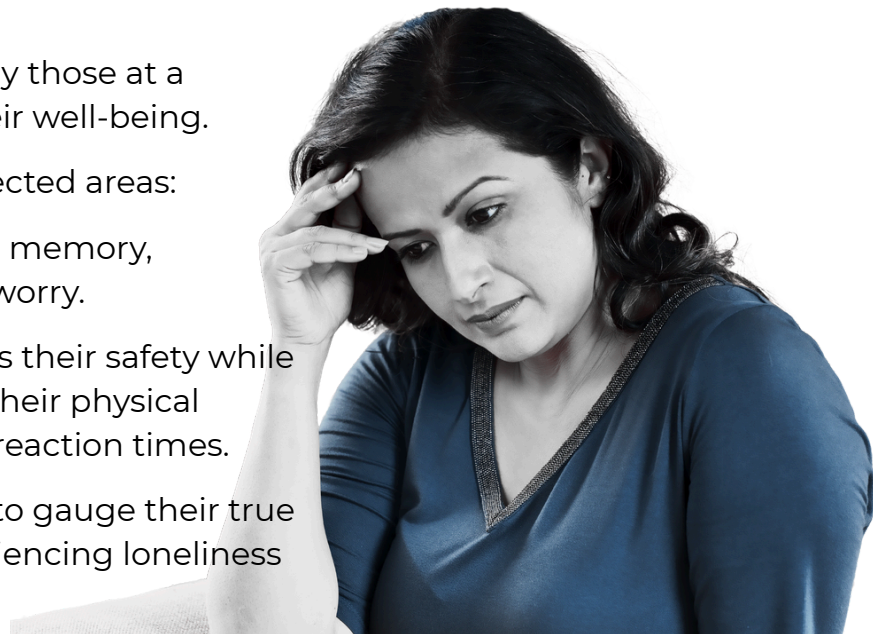

AI powered solution for Cognitive Wellness of Seniors

As parents age, adult children, especially those at a distance, have valid concerns about their well-being.

These often center on three interconnected areas:

- **Cognitive Health:** Subtle changes in memory, attention, or focus are a significant worry.
- **Physical Safety:** A primary concern is their safety while living independently. This includes their physical responsiveness, their alertness and reaction times.
- **Emotional Well-being:** It is difficult to gauge their true emotional state. They may be experiencing loneliness or social isolation.

The Solution

Your goal is to enhance Cognitive Stimulation for better outcomes in

- Mental Agility
- Alertness and Reflexes
- Cognitive Responsiveness
- Retention of attention for engagement and focus

Learidge - The Learning Bridge offers a comprehensive AI enabled solution designed to help you ensure your parents' cognitive well-being, even when your own professional and personal commitments keep you occupied or at a distance.

This platform enables you to respectfully monitor key cognitive wellness outcomes and progress. Furthermore, it delivers proactive, non-invasive insights, empowering you with the clear, actionable information needed to provide timely support and stay meaningfully connected.

Core Solution Features

Senior-Friendly User Application

A dedicated, mobile-friendly application for your parent, providing "Anytime and Anywhere" access. Supports 12 Indian languages, removing language barrier, ensuring a comfortable, accessible experience with Alerts and Messages delivered on WhatsApp

Cognitive & Reminiscence Content

Provides access to a comprehensive library of 20,000+ gamified quizzes, puzzles, and games. The content is strategically designed to enhance reminiscence by connecting users with Indian Mythology, History, and Cultural stories, they are all familiar with.

Family Dashboard Module

A secure, English-language dashboard for the adult child or caregiver. This module provides non-invasive tracking of key wellness outcomes, progress, and proactive insights based on your parent's positive engagement.

How it works ?

Our platform is more than just fun, the quizzes, the puzzles are designed to enhance cognitive processing, which is linked to improve alertness and reflexes. The heritage-based topics act as a powerful form of 'Digital Reminiscence Therapy,' proven to boost mood and reduce anxiety.

This dual-mechanism, training the brain's processes with gamification while engaging its emotional core with heritage content—creates a synergistic effect that no generic puzzle or number game can replicate.

Your Parent's AI-Enabled Personal Adaptive Coach

Learidge is much more than just a static library of quizzes; it is a genuinely "AI-enabled solution" that acts as a personal, dynamic, and adaptive coach. We recognize that every parent is unique, with individual preferences, skills, and pacing. Our AI evaluates their engagement to customize the content, and delivery guaranteeing that the experience is both rewarding and enjoyable.

Prevents Frustration & Boredom

The AI dynamically adjusts the difficulty of quizzes in real-time to ensure they feel engaged and stimulated.

Delivers a Joyful Experience

The AI acts as a personalization engine. It delivers more of the content that brings them joy, making every session feel relevant and personal.

Provides Supportive "Hand-Holding"

The AI ensures your parent is making progress and learning by providing a guided, hand-holding experience with hints, reframing and explanations that encourages progress and learning.
